

Purestream *ES* introduces . . .

The Model PES-FPP Floating Portable Pump

This versatile, powerful pump is the ideal piece of equipment for emergency fire control, pumping out sand traps and flooded basements, and quickly removing excess water from construction sites.

The portable unit weighs only 62 pounds and measures slightly less than 27" x 21" x 15", yet delivers an impressive 165 gpm at 45 feet T.D.H.

Design features of the Floating Portable Pump include:

- A powerful Honda GXV160 5.5hp, 4-stroke gasoline engine
- Operates in water levels less than one inch
- An adjustable throttle controls the flow
- Rugged pump handles 20 mm solids
- Float is a durable polyurethane foam-filled polyester laminate
- Contains no seals or bearings, so pump can be run dry without harm

FLOATING PORTABLE PUMP

**FLOATING PUMP SHOWN WITH
SURFACE SKIMMER ATTACHMENT**

**PUMP AND MOTOR
SHOWN WITHOUT FLOAT**

The complete PES-FPP unit includes:

- Float, pump and motor
- 33 feet of hose with 2-inch male threaded hose barb
- 2-inch female threaded hose barb as an extra
- Spark plug wrench for easy maintenance
- Honda engine instruction and maintenance booklet
(Spanish available)

MODEL PES-FPP

MODEL PES-FSC

Optional Sludge and Spill Collector

Available as an option is the Model PES-FSC Floating Sludge Collector. Made of the same high quality materials as the Floating Portable Pump, this floating cradle attachment allows pumping from the surface only. This attachment is recommended for agricultural use when clearing ponds or watering holes of floating algae or duck weed.

The cradle attachment can also be used in a spill emergency where the spilled substance floats on water, such as oil or gasoline.
